

Imm'Oxy

Muscle protection and well-being

Oxidative stress occurs when the production of free radicals exceeds the body's antioxidant defenses. As part of intense exercise, the production of pro-oxidant factors increases.

Imm'Oxy has been formulated to provide horses with the support necessary for good physical and muscular resistance.

Composition

Dextrose, salt

Analytical components

Moisture	98,1%
Crude fat	< 1 %
Crude cellulose	< 1 %
Crude protein	< 1 %
